Availability: January 2026 - August 2026

Education

Northeastern University Boston, MA | Khoury College of Computer Sciences Sep 2024 - May 2028
Honors Candidate for BS in Computer Science and Business Administration, Concentration in Marketing Analytics
GPA: 3.864 / 4.0 | Awards: Dean's List
Relevant Coursework: Object-Oriented Design, Fundamentals of Computer Science 1 and II (Accelerated)

Experience & Leadership

Co-Head of Operations and Software Developer Jan 2025 - Present
Sandbox at Northeastern Boston, MA

- Direct day-to-day operations by managing logistics (onboarding, room bookings), finances (club expenses, merchandise orders, reimbursements), and communications, ensuring efficient coordination across 65+ members.
- Collaborate with developers and UX designers to build Good Dog Licensing, a full-stack web application that automates the music licensing process for Northeastern's Green Line Records, improving the current manual process for musicians and media makers to create accounts, submit content, and be matched seamlessly.

CS Curricula Team Lead May 2025 - Present
FirstByte at Northeastern Boston, MA

- Establish partnerships with STEM-centric student programs across Boston through outreach and collaborations.
- Lead a team of 8 in designing and delivering engaging workshops that teach core computer science concepts in accessible, practical ways to a variety of Boston-based student programs (e.g., Camp Harbor View).
- Lead interactive workshops for 30+ students on foundational topics such as web development, Python, and cybersecurity, strengthening their technical skills and boosting engagement through hands-on activities.

Online Store Manager Jan 2020 - Present
Depop Remote

- Independent online clothing reseller, with 90+ sales.
- Spearhead operations, including product sourcing, product listing, customer service, and sales operations.

Projects

Good Dog Licensing | *React, Next.js, TypeScript, tRPC, Prisma, TailwindCSS* Jan 2025 - Present

- Implement CRUD operations and API endpoints for music submissions and approvals.
- Built and integrated responsive frontend components with tRPC endpoints, ensuring type-safe client-server communication and streamlining user workflows.
- Develop interactive admin dashboards, profile pages, and submission tracking features, improving efficiency and streamlining project oversight.

PlaNUr (Course Planning Platform) | *React* Sep 2024 - Dec 2024

- Built a web application that enables students to evaluate and compare courses by entering CRNs.
- Built an error handling feature for invalid inputs and a side-by-side class comparison feature.
- Collaborated with a team of 5 to integrate front-end and back-end components, using GitHub for version control.
